[NAME OF DOCUMENT] Abstract

[ABSTRACT]

[OBJECT]

5 This invention relates to detection and identification of a novel cyclin I protein. More specifically, it provides a polypeptide for human cyclin I and a polynucleotide encoding each polypeptide of human cyclin I.

[SOLUTION]

10 Identify human cyclin I and elucidate biochemical functions of the human cyclin I. Further, determine the amino acid sequence of the polypeptide for the human cyclin I. Furthermore, determine the base
15 sequence of the gene encoding the polypeptide for the human cyclin I.
